Education

SRM Institute of Science and Technology
Bachelor of Technology in Computer Science and Engineering *2024 – 2028*

Experience

Founding Engineer
BroPay

- Shipped **BroCred** to the **Chrome Web Store**: a Manifest V3 extension that detects checkout pages and ranks a user's cards by effective return across **277 mapped merchant domains**
- Developing the **BroPay** backend in **Java** and **Spring Boot**: **Gmail OAuth 2.0** integration, bank-statement email ingestion and PDF extraction on a layered **PostgreSQL** schema
- Designing the database schema for the next product and built the websites for BroCred, BroSubs and BroPay

Projects

TubeSync | *Java, Spring Boot, Spring Security, WebSockets, PostgreSQL, Next.js, Docker* Live

- Built a real-time watch-party app where a **Spring Boot** server owns playback state and broadcasts play, pause and seek events to each room over **WebSockets (STOMP)**, with client drift correction for late joiners
- Secured **REST APIs** and the WebSocket handshake with **JWT** authentication in **Spring Security**; enforced 4 user roles server-side using the Strategy pattern
- Persisted chat in **PostgreSQL** with Spring Data JPA, tested with scripted multi-user clients, and deployed a multi-stage **Docker** image

Pavo | *Java, Spring Boot, REST API, Next.js, React, TypeScript, Docker* Live

- Built a full-stack college discovery platform on a layered **Spring Boot REST API** (Controller, Manager, DAO) with a **Next.js / React** frontend for search, filter and sort
- Containerized the backend with a multi-stage **Dockerfile** and deployed it on Render, with the frontend on Vercel

AtlasForge | *Kotlin, Android, GraphHopper, OpenStreetMap*

- Built an Android navigation app with **fully offline routing**: builds a weighted **road graph** from on-device OpenStreetMap data and runs **shortest-path** search in **under a second** with turn-by-turn directions

Achievements & Responsibilities

Tech Lead, ISTE SRM IST

- Built the Techescape Room event platform (authentication, interactive challenges, live leaderboard) used by **300+ participants**; mentor junior developers
- Shipped OTP-based registration validation and a QR-code entry and attendance system; automated registrations with Google Apps Script

Tech Lead, Rangeen Pixels SRM IST

- Building the club website from scratch and running its forms, tooling and event operations

Hackathons

- **Ideathon 3.0**: 3rd place of 35+ teams · **Adobe University Hackathon**: cleared Round 1 (top ∼8%)
- **Smart India Hackathon**: qualified college selection round · **Hyperthon 2.0**: honourable mention

Technical Skills

Languages: Java, SQL, JavaScript, TypeScript, Kotlin, C/C++
Backend: Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs, WebSockets, JWT, OAuth 2.0
Databases: PostgreSQL, MySQL, SQLite
Frontend: React, Next.js, HTML/CSS, Chrome Extensions (Manifest V3)
Tools: Git, GitHub, Docker, Linux, Maven, JUnit, Vercel, Render
